APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

(CONTINUED ON PAGE 2)  
The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.3465 cubic feet per second, but not to exceed 45.2 million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before July 24, 1987  
Proof of completion of work shall be filed on or before August 24, 1987  
Application of water to beneficial use shall be made on or before July 24, 1990  
Proof of the application of water to beneficial use shall be filed on or before August 24, 1990  
Map in support of proof of beneficial use shall be filed on or before

Completion of work filed IN TESTIMONY WHEREOF, I PETER G. MORROS  
State Engineer of Nevada, have hereunto set my hand and the seal of  
Proof of beneficial use filed my office, this 24th day of July

(PERMIT TERMS CONTINUED)

The total combined duty of water under Permits 26672 and 48567 shall not exceed 45.2 million gallons annually.

The total combined diversion rate under Permits 26672 and 48567 shall not exceed 0.3465 c.f.s.

The total number of units that can be served from Permits 26672 and 48567 shall not exceed the 127 units shown on the Proof of Application of Water to Beneficial Use submitted on August 29, 1979.

This permit is issued as an alternate source for the permittee with no increase in combined diversion rate or total annual duty, and with the understanding that this permit is issued under the provisions of NRS 534.120(2) as a preferred use based on the need for a back-up well for fire protection and public health considerations.
